

Project name:

Running Mate

Team members and their assigned responsibilities:

Ben Do and Kyaw Htet Paing Win

- Research
- Design
- Programming
- Testing and evaluation

Delivered items:

- Project Proposal
- Source Code for Running Mate application
- APK file
- Project Design Document

The name and website address of any third party tools, components, services that is going to be used in the project:

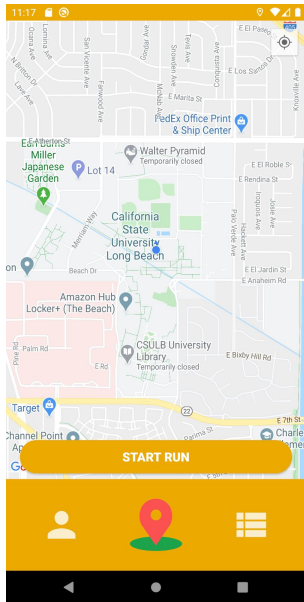

- Firebase
 - <https://firebase.google.com/>
- Android-SimpleLocation
 - <https://github.com/delight-im/Android-SimpleLocation>
- Picasso
 - <https://square.github.io/picasso/>
- Google Maps
 - <https://cloud.google.com/maps-platform/>

Tentative sketch of screens with itemize functionalities and features in

<div><h3>Log in</h3><div><div>11:17</div><div></div><div></div></div><p>Running Mate!</p><p>Login</p><div><div>email</div><div>password</div></div><div><div>→</div></div><p>Not a member yet? Sign up now!</p><p>Forgot Password</p><div><div>◀</div><div>●</div><div>■</div></div></div>	<ul style="list-style-type: none">• Authenticate and log in user• Reset password
---	---

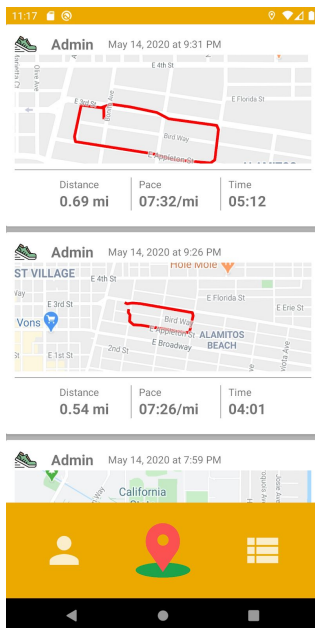

<div><h3>Registration</h3><div><div>11:17</div><div></div><div></div></div><p>Become a member</p><p>Sign Up</p><div><div>name</div><div>email</div><div>password</div></div><div><div>→</div></div><p>Already Have an Account? Login Now!</p><div><div>◀</div><div>●</div><div>■</div></div></div>	<ul style="list-style-type: none">• Register user using Firebase Auth
---	---

Home Screen

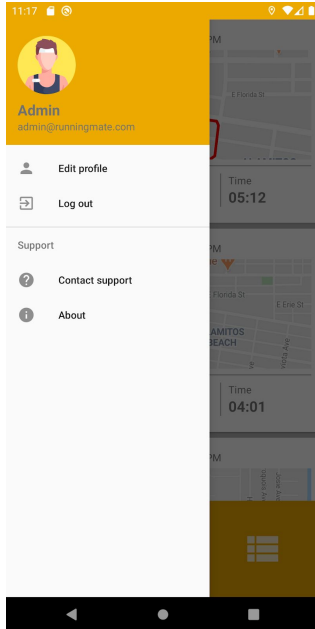

- Start new run
- See activity feed
- Open profile

Activity Feed

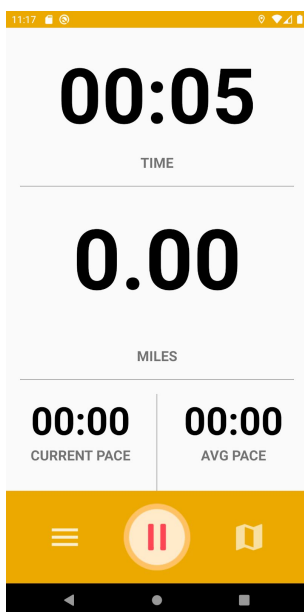

- See previous runs
- Go to Home
- Open profile

Profile

- Edit username
- Log out user

Run Activity

- Track and log run data
- Save run data in database

Tentative Objects model
